

D-TOX FACT SHEET

1) What is D-Tox?

D-Tox is a purifying combination of 8 different herbal extracts. Working together, they eliminate harmful germs from the body and reduce bacteria.

2) But my doctor really isn't interested in alternative therapies and I know that he won't agree with me taking it?

If you would like a doctor's opinion, we can contact our in-house doctor and put any questions to him for you.

3) I am taking other prescribed/complimentary medication; do I really need to tell my doctor before supplementing D-Tox?

Yes, we would always advise informing your doctor of any product that you wish to supplement. Your doctor will need to monitor your health and supplementing another product could contraindicate with your medication.

4) I am taking medication for epilepsy, can I take D-Tox?

No, as D-Tox can make seizures worse.

5) I am on blood-thinning medication; can I take D-Tox as well?

I'm afraid the answer is no, as D-Tox could seriously affect how the medication works. If you would like confirmation we can contact our in-house doctor for you

6) Why do I need to take D-Tox?

Many factors in our life such as poor diet, chronic stress, pollution and free radical damage can all build up in our bodies. This in turn, leaves you feeling tired and sluggish with a lack-lustre appearance. D-Tox gathers the toxins in the body and flushes them out, restoring the body's delicate natural balance.

7) How does D-Tox work?

Toxins that enter our body through food and air etc; are stored in our bodies. When we burn fat these toxins do not disappear but stay in our system. Toxins disrupt proper body functions resulting in ill health. D-Tox helps discharge these toxins quickly and raise oxygen levels in the tissues. (See ingredients list below for further information)

8) How long should I take D-Tox for?

You would normally start to feel the benefits of D-Tox after three to five days but we would recommend taking it for up to four weeks.

9) Can I take D-Tox with other WWH products?

Yes there are no known contraindications with any other WWH products.

D-Tox Ingredients Per capsule

Burdock Root **200mg**

It is said to cleanse the entire system and acts as a blood purifier and natural diuretic. It is used to treat skin disorders such as eczema and can also help to improve urinary tract infections.

Red Clover **50mg**

This plant is believed to suppress the appetite and contain small amounts of naturally occurring silica, choline, calcium and lecithin.

Sheep Sorrel **200mg**

This is a diuretic, antiscorbutic (vitamin C) which helps treat urinary problems.

Slippery Elm Bark **50mg**

The inner bark of the elm tree is the usual origin of this. Its main constituent is the mucilage, a gum dissolved in the bark's juices, it is said that it has the cleansing properties that are utilised within the body.

Rhubarb Root **200mg**

The dried root is commonly used as a treatment and is a powerful natural laxative, thus extorting the toxins within the body.

Cat's Claw **200mg**

Its main constituents; oxyindole alkaloids and glycosides appear to give it much of its activity as an anti-inflammatory, an antioxidant and immune system booster.

Milk Thistle **50mg**

It contains a compound called Silymarin, which protects the liver by blocking the entrance of harmful toxins and helping to remove these toxins.

Kelp **50mg**

Also known as Laminaria, it is a sea vegetable that helps maintain normal metabolism and dissolves fatty wastes that may clog up your system.
